Guidelines for Income Calculation Worksheet: Part II

When calculating income, use any one of the following methods as appropriate. A separate form should be used for each family member with income. The examples are illustrative only and as many pay stubs as needed and available to accurately calculate family income should be obtained.

1. STRAIGHT PAY METHOD

Under the Straight Pay Method, pay stubs covering the most recent three to four months of family income should be submitted. Upon review, it is determined that the wages on the pay stubs are the same, with no variations.

The income is calculated based upon the wages indicated on one of the pay stubs, since there are no variations in the gross income on any of the pay stubs. Based upon the length of the pay period the gross income is multiplied by the number of pay periods in a six-month period (weekly = 26, bi-weekly = 13, or monthly = 6).

The result will be the six-month income used to determine WIOA low-income eligibility.

EXAMPLE:

Five bi-weekly pay stubs are provided indicating gross wages of \$548.00 each. The pay stubs are sporadic and cover a period of three months but there is no variation in the gross income.

Multiply: $\$548 \times 13 = \$7,124$.

\$7,124 is the six-month income used to determine WIOA low-income eligibility.

2. AVERAGE PAY METHOD

Average Pay Method is used if there is a variation in pay from pay stub to pay stub and it is a result of overtime, lost time, or working for different employers.

To compute the six-month income, the gross earning total of all the pay stubs provided is divided by the number of weeks in the timeframe for each pay stub submitted (weekly = 1, bi-weekly = 2, monthly = 4.3). These totals are added together and divided by the number of pay stubs submitted. The resulting average gross weekly income is then divided by 26 determining the 6-month income.

EXAMPLE:

Example 1:

Three pay stubs are provided and the pay frequency is bi-weekly: \$1,009, \$932, \$1,032

Divide each amount by 2 (bi-weekly: $1009/2 = \$504.50$; $932/2 = \$466$; $1032/2 = \$516$ Add totals together: $\$504.50 + \$466 + \$516 = \1486.50

Divide by 3 (# of pay stubs submitted): $\$1486.50/3 = \495.50

Multiply total by 26 (# of weeks in a 6-month period): $\$495.50 \times 26 = \$12,883$

\$12,883 is the six-month income amount used to determine WIOA low-income eligibility.

Example 2:

Six pay stubs are provided and the pay frequency is weekly: \$534, \$475, \$398, \$534, \$498, and \$534

*You can skip the first step since the pay frequency is weekly and you would be dividing each amount by 1

Add: $\$534 + \$475 + \$398 + \$534 + \$498 + \$534 = \$2973.00$

Divide by 6 (# of pay stubs submitted): $\$2973/6 =$

$\$495.50$ Multiply total by 26: $\$495.50 \times 26 = \$12,883.$

\$12,883 is the six-month income amount used to determine WIOA low-income eligibility.

3. YEAR-TO-DATE METHOD

Under the Year-To-Date Method of calculating six-month gross income, the participant provides recent pay stubs with cumulative year-to-date gross earnings indicated on the pay stub. The cumulative year-to-date gross earnings indicate the gross earnings up to the date of the pay period ending date, on the pay stub.

To compute the six-month income, the intake worker counts the number of cumulative weeks that have occurred in the year-to-date period, and divides that number into the gross year-to-date earnings indicated on the pay stub to get the weekly gross income. The result of this computation weekly gross income is then multiplied by the number of weeks in a six-month period to determine the six-month gross earnings.

EXAMPLE:

Participant provides the intake worker with a recent pay stub dated July 3rd showing his **year-to-date earnings** were \$25,200 so far that year. The cumulative number of weeks for the year is 27, Calculation of the gross annualized income would be done as follows:

Divide: 25,200 by 27 = \$933

Multiply: \$933 by 26 (No. of weeks in 6 months) = \$24,258

\$24,258 is the 6-month income figure for this individual or family member.

4. INTERMITTENT WORK METHOD

When an applicant has not had steady work with one or more employers, they should supply as many pay stubs as possible and complete an Applicant Statement explaining all missing pay stubs and not-work periods during the last six months.

If an applicant reports little or no includable income, they should indicate the resources relied upon for life support during the last six months, on the Applicant Statement. Such resources may include such things as unpaid debts, gifts, loans, unemployment compensation, etc.
